

E-CLEAN(CS)

Plant derived
Removal of scales and
scales (scaly coating) of
mineral deposits

Using plant-based materials as corn, soybean, safflower, sugar cane, apple, others.

characteristics

- It can also be used on hard, smooth surfaces such as faucets, bathtubs and tiles in bathrooms and toilets**
- Using fine particles of natural stone to remove inorganic contamination (scaly coating, water scale, urinary stone, rust etc.)**

advantages

- Effective and economical in small amounts**
 - Not easy to cause scratches on hard, smooth surfaces**
- *Materials such as plastic and non-glass mirror finish may be scratched**

Label of export is not same as in Japan

Packaging 480gx20/24kgx1

Example

■ water scale ■ glass ■ concentration: 100% ■ standing time: 0

Biodegradability test result:
96.4%
 (excluding natural stone)

General data :

How to use	
Hand washing	Take an appropriate amount to a sponge containing no abrasive, rub on in circular, up-down, and left-right motions to remove dirt, and rinse thoroughly with water.
Machine washing	Rinse off the dirt from surface. Apply an appropriate amount to the surface to be cleaned. Agitate product using single-action polisher equipped with a white pad, adding water to keep wet. Rinse thoroughly with water.

GENERAL	liquid	Water soluble
	pH	9.1
LAW	CSCL	Not applicable to PRTR
	FSA	Not applicable
	Labor law	Not applicable in organic law
SAFETY	biodegradability	96.4%
	LD50 (oral)	5,000mg/kg
	LD50 (dermal)	5,000mg/kg

- Be sure to wash any loose dirt off of the target surface with water before cleaning. It is recommended to test surface for scratching in advance, especially if surface appears to be soft.**
- Please shake before use. If it is not used for a long time, it may become separated, but it does not affect performance, if properly shaken before use.**
