

Using ingredients derived from soybeans, corn, coconuts, safflower, sugar cane, etc.

Nondangerous chemicals

# E-CLEAN(HDHC)

Plant-based hand cleaner for removing stubborn dirt

## Features

- Does not contain substances that harm humans or the environment
- Prevents the occurrence of soap scum from washstand
- Prevent formation of slime, clogging and bad smell in drainage pipe, septic tank and grease trap.

## Merits

- Moisturizing ingredients moisturize and ameliorate roughness of hands
- Drainage is naturally improved

Packaging 20L,200L,1000L IBC

## Examples

Concentration : Undiluted solution

Over the years, the dirt has not been removed from the fingerprints

The dirt is removed well and his hands are moisturized

## How to use

Wet both hands with water and take the appropriate amount in hand (1-3 times with pump), then rinse well. Better to use warm water (more effective than cold water.)

## Safety data for humans

[Human Repeat Insult Patch Test]  
(tests irritation and allergy potential)

Japan Association For Inspection Investigation Of Foods Including Fats And Oils

## E-CLEAN(HDHC)

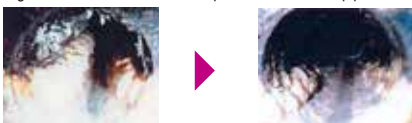

Biodegradation test result :  
97.9% (JIS K 3363)

- Headquarters:  
Takizawa Building,3-3-6 Ebisu,Shibuya,Tokyo,Japan
- Test Center:  
2257 Nakakugi,Nishi-ku,Saitama City,Saitama,Japan
- Factory:  
2023 Hokunan Moro,Yuki,Ibaraki,Japan

## Additional benefits

Readily biodegradable so it contributes to improvement in waste pipes and cisterns.

<Waste pipes> By changing from conventional products to this product, microorganisms are activated and clogging is ameliorated

<Cisterns> By changing from a conventional product to this product, microorganisms are activated and the malodor is improved
